LinkedIn: <https://www.linkedin.com/in/daiana-celeste-lopez/>

Education

UTN-BA — Advanced UX/UI Diploma (in progress)
Henry — Full Stack Web Developer (2025)

Professional Profile

UX/UI Designer with hands-on product experience and a background in frontend development. Specialized in UX research, MVP definition, information architecture, user flows, wireframes, and interactive prototyping. Experience working for 6 months on a live SaaS product, collaborating with development teams to ensure visual consistency and technical feasibility. Portfolio documented with full case studies showcasing process, strategic decisions, and design iterations. I integrate AI tools to optimize research synthesis and solution exploration.

UX/UI Skills

- UX Research (interviews, benchmarking, desk research)
- User Personas, Empathy Maps, and Affinity Mapping
- Information Architecture and User Flows
- Wireframing and Interactive Prototyping in Figma
- Design Systems and Atomic Design
- Usability testing and accessibility principles (WCAG)
- AI integration (OpenAI) for research synthesis and hypothesis generation
- Use of Figma Make to accelerate base layouts

Experience

DonMorfi — UX/UI Designer Intern & Frontend Developer (6 months)

Nov 2025 – May 2026

Active participation in a real, live SaaS food product. Designed and improved exploration, ordering flows, and administrative dashboards. Created a reusable component system in Figma using Atomic Design. Collaborated directly with development to ensure proper implementation and visual consistency. Case fully documented in portfolio with justified design decisions.

StudioConnect — UX/UI Designer & Frontend Developer

Aug 2025 – Sept 2025

Designed authentication, dashboard, and booking system. Built interactive prototypes with a strong focus on responsive experience.

TaskApp — UX/UI Project (UTN.BA)

Conducted full UX research, MVP definition, information architecture, and a navigable prototype based on Atomic Design.

Tools and Technical Knowledge

UX/UI: Figma (Auto Layout, Variants, Design Systems), Interactive Prototyping, Information Architecture, User Flows, Wireframing, Heuristic Evaluation, Surveys, Accessibility (WCAG).

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, REST APIs, Git.

AI Optimization: OpenAI for research synthesis and hypothesis generation, Figma Make for base layout exploration.

Languages

English: Intermediate A2 (currently improving)
